RE: PROPOSED PCB STUDY

Dear Phil:

Enclosed is a drilling specification for the proposed monitoring well(s). Also included is a site map prepared for use in the investigation. As I told you last week, Sweet-Edwards will supervise installation of the monitoring well and provide a well log and letter report for \$2,345.00. Sweet-Edwards will sample five wells, as discussed, for \$3626.00 not including lab testing costs.

Enclosed is a breakdown of the lab costs quoted by Lauck's. The testing program I recommend is TOC, TOX, pH, EC (Quad Reps), plus total Aroclors.

Given that this is a busy time of the year for everyone, please give us some advanced notice prior to any required field work. I understand you may call for drilling bids based on the attached specification. I suggest you ask for lump sum bids.

If you have any questions, please call.

Respectfully submitted,

SWEET, EDWARDS AND ASSOCIATES, INC.

JOHN E. EDWARDS
Associate Geologist
